Contract Awarded for Wilson and Pershing Avenues Road Project

The project's scope includes constructing curb and gutter on both sides and sidewalk on one side. The final design for the roadway and drainage improvements is complete. All easements and rights-of-way have been obtained. The Town Council awarded the construction contract in February. The utility relocations have begun. Construction on this one-year project is anticipated to be completed by Spring 2006. For more information, contact Mr. Nagi Elsewaissi, P.E., Director Capital Projects, 703-771-2794 or e-mail ocpm@leesburgva.gov.

Surveying has begun on the Wilson and Pershing Avenues road project.

Council Approves \$9.5 Million Bond for Neighborhoods

The Town Council recently approved \$9.5 million worth of bonds to finance twenty capital improvement projects. These projects will help address a variety of neighborhood needs, including drainage, sidewalks, roads, and traffic mitigation. Construction start dates vary with each project based on the design, work performed to date, and the resources available. Some projects have undergone initial design, community meetings, and are ready to begin construction. Others will require a bit more work to get that level. Please note that 2005 Bond funds supplement funding from previous town bonds, town General Fund dollars, and for a few major highway projects, state or county funds. For more information on project activities and schedules, contact Mr. Nagi Elsewaissi, P.E., Director of the Office of Capital Project Management at 703-771-2794 or nelsewaissi@leesburgva.gov. For information on funding, contact Mike Freda, Management and Budget Officer, 703-737-7016 or mfreda@leesburgva.gov or visit www.leesburgva.gov.

What is a bond?

Bonds are types of debt. The town and other governments may borrow funds from investors and pay back a specific amount based on the amount borrowed, an interest rate, and the "maturity date".

What is debt service, how much does the town have, and what's the impact of this recent bond?

Debt service is the town's version of debt payments, just like your personal finances- the principal and interest on debt generated from issuing bonds. The town's top priority is paying debt service and a balanced budget. Bond agencies like Standard and Poor's Ratings Group, Moody's Investor Service, and Fitch's, review the town and other governments as a bond issuer, for credit quality and ability to pay the amount borrowed on time and in full. Town staff works hard to ensure they protect public funds and maintain a good credit rating to use if borrowing funds is necessary. The town also factors debt service into long-range financial planning to address the impact of debt on available resources.

How are projects scheduled?

The Department of Capital Projects Management works closely with contractors to address the needs of the community given safety needs, available funding, staff resources to administer projects, and related activities.

How can I let the town know my ideas on current or future needed improvements?

The Department of Capital Project Management's engineers are available to meet with you to discuss your ideas and answer questions. You may also share your ideas with the Town Council during their regular Town Council Meetings (2nd and 4th Tuesdays at 7:30 pm, when not conflicting with holidays), and during Town Council public hearings. Hearings are held specifically on the budget, tax rate, and the Capital Improvements Program. All are advertised on the bulletin board in Town Hall (25 W. Market St.), as well as online, www.leesburgva.gov. Each project also has a community meeting and/or series of meetings for the public to provide feedback.

TOWN BUDGET SCHEDULE ESTABLISHED

The Town Council is set to review the Town Manager's proposed budget and Capital Improvements Program (CIP) during the months of March and April. A public hearing on the proposed budget is scheduled for April 12, 2005, 7:30 pm, Town Hall, 25. W. Market Street. A series of worksessions will be held with the goal to adopt a budget on April 26, 7:30 pm, Town Hall. For a complete schedule of worksessions, please call 703-771-2733 or visit www.leesburgva.gov. For more information on proposed budget, contact Annie Carlson, Management and Budget Analyst, or Mike Freda Management and Budget/ Officer, in the Finance Department at 703-669-3076 or 737-7016, or acarlson@leesburgva.gov.

PLEASE PARDON OUR DUST!

Thomas Balch Library, our town-owned history and genealogy library, will undergo a variety of repairs and preventive maintenance efforts over the next few months. This historic building requires quite a bit of tender care. Patrons and neighbors in the Historic District, please pardon any inconvenience that maybe caused. Work will be expedited and preformed as quickly as possible during regular weekday business hours, confined to the building and parking lot, with no work performed in late evenings. In the event of inclement weather delays or emergency repair situations, the contractor may work on Saturdays. If you have questions or need additional information, please contact Bob Lilly, Chief of Inspections and Operations at 703-771-2795. For more information on Balch Library, including the collection, classes, and special programs, call 703-737-7195 or visit www.leesburgva.gov.

Wayfinding Signs - Be a Visitor in Your Own Hometown!

Leesburg is home to many historic, natural, and entertainment landmarks and sites, from the Historic District, to Balch Library, to Ida Lee and Morven Parks, to the Outlet Center and more. To help you explore those sites, the town has designed wayfinding signs. Look for new signs to welcome visitors, distinguish Leesburg and our community's features, and help visitors locate our great destinations. Installing the wayfinding signs will be a multi-phased approach. Phase I started in March 2005 and should be completed later this Spring. Look for proximity signs, as well as new, clearer signs in the Town Hall garage. Additional funding is needed for future phases. For additional information on this project please contact Ms. Renee LaFollete, P.E. at 703-737-6071 or email ocpm@leesburgva.gov. For information on shopping, dining, and attractions around town, contact Ms. Marantha Edwards, Tourism Coordinator, at 703-737-7019 or medwards@leesburgva.gov or visit www.leesburgva.gov and click on "visitors".

Fort Evans Road Improvements Design Continues

The design of improvements for Fort Evans Road has changed following the evaluation of outfall, drainage, geotechnical and hydraulics analyses. The Town Council approved a change order to the original contract to accommodate a design that better addresses individual commercial sources of stormwater flows in the area. When final design is reviewed and approved later this summer, improvements will include the construction of storm drainage improvements including curb, gutter, and sidewalk on the west side of Fort Evans Road, between Heritage Way and East Market Street. The project will also address flooding and provide adequate outfall, accommodate increasing traffic and provide a continuous sidewalk from East Market Street to Heritage Way. The estimated project cost is just over \$1.875 million for design and construction with \$1.5 million approved in the recent bond approved by Town Council. For more information on this project, contact Ms. Anne Geiger, P.E. at 703-771-2742 or ocpm@leesburgva.gov.

North King Street Drainage

This project helps address flooding in residential areas by improving and replacing the area's storm sewer. It also will provide a permanent improvement to the hospital outfall. The project boundaries are North King Street between Wirt and Church Streets, crossing King Street from North Street to Union Street. Construction will start in Summer 2006 after acquiring necessary easements. Ms. Anne Geiger, P.E. is the project contact at 703-771-2742 or ocpm@leesburgva.gov.

3 New Bus Shelters for Summer 2005

The town, Virginia Regional Transit Authority (VRTA), Loudoun County, and VDOT have partnered to provide bus shelters in three locations in Leesburg - at the front of the Shenandoah Building, at One Harrison Street, and at the end of Fort Evans Road. While VDOT funding was originally proposed, VRTA has offered to expedite the process and pay for the project. Construction will begin within two months of receipt of an Access and Maintenance Agreement from Loudoun County for the two shelters on the County's property. In addition, a fourth bus shelter has been added at the corner of Depot Court and Harrison Street, the most feasible location to accommodate senior center users and Morningside residents. Look for these new shelters in Fall 2005. For more information on transit services offered by VRTA, contact VRTA at 703-771-2742. For more information contact Ms. Anne Geiger, P.E., Capital Projects Engineer, at 703-771-2742 or e-mail ocpm@leesburgva.gov.

AIRPORT RUNWAY EXPANSION

Leesburg Executive Airport's runway is set for expansion. The 90-day project is estimated to cost about \$3.5 million, funded primarily by the Federal Aviation Administration (FAA). The goal is to modify the runway to accommodate larger jets. Work will begin in May and end by September 2005. Ms. Renee LaFollette, P.E., Capital Projects Engineer, is available to answer questions at 703-737-6071 or ocpm@leesburgva.gov.

Safety Improvements Set for Tolbert Lane and Sycolin Road

Loudoun County has funded \$150,000 for a traffic signal at the Tolbert Lane and Sycolin Road intersection. The signal will help improve safety and mitigate traffic congestion. The goal is to install the new signal before the next school year. For more information, contact Ms. Renee LaFollette, P.E., Capital Projects Engineer, at 703-737-6071 or ocpm@leesburgva.gov.

Town/Oaklawn Agreement to Construct Road

The town and Oaklawn recently entered into an agreement to build about 2,000 feet of roadway at the intersection of Sycolin and Lawson Roads, the latter the future Battlefield Parkway. This would construct the roadway about five years ahead of schedule. Construction is anticipated to start by March 2006 and be complete by Spring 2007. For more information contact the Director of Capital Projects Management, Mr. Nagi Elsewaissi, P.E. at 703-771-2794.

Harrison Street Sidewalk and Drainage

After receiving input from residents, Town Council directed town staff to design and construct a 26-foot wide roadway with no parking on either side (except on Sundays), brick sidewalks on both sides of the street, and an asphalt imprinted brick pattern crosswalk on Harrison Street at Edwards Ferry Road and at North Street. Funds in the amount of \$420,000 are available in this current fiscal year budget to complete design and construction. Please contact Ms. Anne Geiger, P.E. for more information. She can be reached at 703-771-2742 or ocpm@leesburgva.gov.

Edwards Ferry Road and Route 15 Bypass Right Turn Lane

Concept plans have been developed for a free-flow right turn lane from Edwards Ferry Road onto the Route 15 Bypass and an acceleration lane on the Bypass. The aim is to help alleviate congestion at this busy major highway intersection, home to several restaurants and shopping and fuel facilities. Construction is anticipated to start this summer, with completion in Winter 2005.

Funding for the project is \$420,000 of the Governor's congestion relief fund, and \$280,000 from the town's proffer funds. For information or to share comments, contact Ms. Anne Geiger, P.E., Capital Projects Engineer, Engineering and Public Works at 703-771-2742 or ocpm@leesburgva.gov.

Verizon Construction

Town staff has received complaints and inquires from residents with regard to the Verizon construction in

the area. These complaints and inquires range from problems with property damage and digging to general questions about the fiber-to-premise project. Town staff is making every effort to answer questions and provide information to residents. Currently, town staff is keeping track of these complaints and is working with representatives from Verizon and their contractors, Ivy H. Smith Company, to ensure that problems are reconciled expeditiously. Verizon has asked that all complaints be referred directly to the contractor at 1-800-768-8831.

Woodlea Manor Booster Pumping Station

This Spring construction of booster pumps will address low water pressure concerns in the Woodlea Manor area. The pumps will increase the domestic water pressure, increase water storage capacity, and prevent any potential water quality issues inherent to stagnated water. The project is anticipated to be complete by late this Summer.

Town Plan Revision Nears End - Public Input Needed

We need you! The Town Plan is the comprehensive plan that helps determine what Leesburg looks like today and in the future – our transportation, land use, neighborhoods, and parks all reflect the Town Plan. The Plan must be updated every five years. To complement the battery of public input sessions held last summer and fall, the Planning Commission and town staff are presenting the draft Town Plan in various public meetings, including Planning Commission Worksessions and worksessions for other town boards and commissions. The feedback will be used to develop any revisions to the draft Town Plan.

We need your comments! Planning Commission Public Hearings are scheduled for March 31st and April 7th. The Town Council will review the public comments and direction from the Planning Commission and hold a worksession on May 16, a Public Hearing on May 24th, and a special meeting to vote on the revised draft Town Plan on June 14.

To be included in the Town Plan 'E-mailing List' or the 'Mailing List' or for more information, visit www.leesburgva.gov/townplan, e-mail townplan@leesburgva.gov, call 703-771-2765, or come to the Planning, Zoning and Development Department offices at 25 West Market Street, 2nd Floor.

Thanks to everyone who has taken time to participate in making Leesburg a better place to live and work!

LEESBURG WATER LINE

Water Meter Change Out Program Complete!

The water meter change out program is complete! The contractor has completed 12,000 meter replacements, bringing the latest technology to Leesburg. The remote monitoring and billing provides accurate, up-to-date information to help enhance customer service. Thank you for your patience during this project!

Water Pollution Control Facility Expansion Construction Underway.

The Water Pollution Control Facility treats the town's wastewater. The staff at the facility also uses a state-of-the-art process to produce the popular, environmentally-friendly Tuscarora Landscapers Choice (TLC) biosolids product. The expansion of the facility will increase the treatment capacity from the current 4.5 million gallons per day (Mgd) to 7.5 Mgd. The budget for the project is approximately \$37 million. Construction started in January and should be complete by the end of 2007. For more information, contact Mr. Asghar Parirro, Capital Projects Engineer, at 703-737-7130 or ocpm@leesburgva.gov.

Kenneth B. Rollins Water Treatment Plant Expansion.

Staff at the Water Treatment plant treat water from sources like the Potomac River- the result is fresh, clean water for drinking, bathing, and other everyday activities. The purpose of expansion project is to increase treatment capacity from the current 10 MGD to 12.5 MGD. Since the plant is located outside the town's corporate limits, the project documents are currently under review by Loudoun County. Construction is anticipated to start this summer and continue for approximately two years. The estimated project cost is \$18 million. Mr. Asghar Parirro, Capital Projects Engineer, is assigned to this project. Contact Mr. Parirro at 703-737-7130 or ocpm@leesburgva.gov.

Water Line Improvements.

The replacements of aged and deteriorated water lines will continue with five new projects throughout the town. The improvements will also include new pipe loops, fire hydrants, valves and blow offs in order to enhance water quality and flow rates in the affected areas. Approximately \$400,000 is included in the current fiscal year budget for these improvements. Additional funding will be requested in future budgets to meet any continued needs.

Utility Maintenance Building.

Two new buildings will be constructed on property west and adjacent to the Water Pollution Control Facility. These buildings will provide approximately 36,000 square feet of mostly maintenance area and some needed office space for the Utility Lines Maintenance Division. The project is in the final phase of design. Construction is anticipated to start this spring and continue for approximately 15 months. The anticipated cost is \$7.5 million dollars. For more information, contact Mr. Asghar Parirro, Capital Projects Engineer, at 703-737-7130 or ocpm@leesburgva.gov.

Infiltration/Inflow Project.

Efforts to eliminate groundwater inflow into the sanitary sewer lines continues. These efforts will reduce unnecessary load on the water pollution control facility. A maintenance project will be undertaken in summer of 2005 for the continuing improvement and maintenance of the sanitary sewer system.

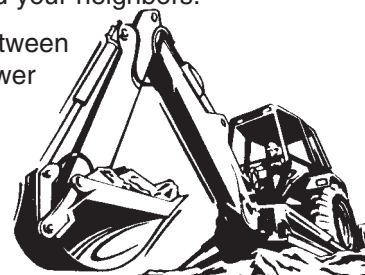

CONTACT MISS UTILITY BEFORE DIGGING

"Miss Utility" is a free service that notifies member utilities to locate and mark all buried utility lines on your property using safety paint or flags. Knowing where all the lines are buried before you or your contractor digs can avoid damaging a utility line that could cause serious injury, costly repairs, or service outages for you and your neighbors.

It is important to note that the Town of Leesburg did not install the water and sewer lines between your home and the property line. Our responsibility is generally from the main water and sewer lines in the street to the property line. Water and sewer lines on private property are the responsibility of the homeowner and will not be marked by "Miss Utility".

The Town of Leesburg is a member of "Miss Utility".
To check on ticket status call 1-800-552-3120.
For more information, call "Miss Utility" at 1-800-552-7001.

17th Annual Leesburg- Loudoun ARBOR DAY CELEBRATION

Don't miss the
17th Annual
Leesburg-Loudoun
Arbor Day Celebration
**Saturday,
April 9, 2004**
10:00 a.m.-3:00 p.m.
at the
**Banshee Reeks Nature
Preserve**

21085 The Woods Road,
Leesburg, Virginia, 20175

FREE FUN
for everyone in the
great outdoors!

- * Learn about the environment, tree care, and products made from trees;
- * Relax and enjoy the beauty of Banshee Reeks Nature Preserve;
- * Take a hike;
- * View photo and poster contest entries;
- * Meet amazing critters like Smokey.
- * Take nature home with a FREE tree seedling to plant at home!

This free event is sponsored by the Town of Leesburg, Loudoun County, the Loudoun County Soil and Water Conservation District, the Loudoun County Extension Office, Banshee Reeks Nature Preserve, and the Virginia Department of Forestry.

Get Into The Swing Of Spring

TIPS FOR EASY, BREEZY, SPRING ACTIVITY PLANNING!

Brush Pick-up- The town picks up brush every Tuesday. No call is necessary. Brush can only be up to 6" in diameter and 4-6' in length, must be placed at edge of curb by Monday night.

Yard sales- The town does not require a permit to hold a yard sale. However signs are not permitted in the public right of way areas like common areas, near sidewalks, and medians of roads.

Block parties- Requests to block streets require town approval. A petition is required from area neighbors. For more information, contact the Police at 703-771-4500.

Special events- A permit is required to hold a special event at town facilities, in area streets, or other public right-of-ways. This includes activities that may impact other residents requiring town coordination on traffic flow, parking, etc. For block parties call the Police non-emergency number 703-771-4500. For other events contact Parks and Recreation at 703-777-1262.

Right-of-way permit- A permit is required to place anything in or conduct work in the right-of-way. Examples of right-of-way are a road, sidewalk, or median area. Before starting your next activity or placing that trailer, dumpster, or sign in the right-of-way, please contact Mr. Michael K. Bomgardner, Engineer, Engineering and Public Works Department, at 703-771-2790.

Spring Tree Care Tips

Spring is an excellent time to give your trees a tune-up and prepare them for their flush of new growth. Town of Leesburg Arborist Jay Banks offers six tips for your landscape trees:

- 1. Remove all guy wires and stakes from your trees that were planted last year or earlier.** Any material that is wrapped around a tree trunk should be removed before the tree's growth period starts to prevent girdling the tree and causing damage to the trunk.
- 2. Remove mulch from around the trunk of your tree and inspect for rodent damage.** During the winter mice will nest in deep piles of mulch and feed on the thin bark at the base of a tree. "From looking at a lot of trees in town, I've seen too many trees with mounds of mulch around them," says Banks.
- 3. Prune any damaged branches.** A torn branch will not "heal" quickly this will leave an open wound on the tree that can attract all kinds of invaders. A clean cut at the branch collar will close properly and tree chemicals are available to ward off disease.
- 4. Inspect the tree over for any over-wintering insect egg masses.** This will be easier to do without leaves on the tree.
- 5. Make your mulch ring wider to help conserve moisture.** Eliminating turf from around your tree eliminates competition for moisture and nutrients. There are 10 times as many roots under a covering of mulch than under turf.
- 6. Do a soil test to see what nutrients are in short supply for your tree.** A test form can be obtained from the County Extension Office. This test will help you to fertilize your tree with the correct nutrients that it needs.

Be a good neighbor- RECYCLE!

How? Residents and businesses receiving town trash collection also receive weekly curbside recycling pickup. The night before your recycling pickup, place newspaper, aluminum or steel cans, plastic bottles and containers, glass bottles and jars, white paper, or cardboard in the blue recycling bin and place the bin at the curb.

When? Your recycling day depends on where you live:

SE and SW Quadrants (including South King and W. Market Streets)- Thursday

NE and NW Quadrants (including North King Street)- Friday

Businesses' recycle days are Thursdays and Saturdays

It's that easy. The town provides a blue recycling bin to each home that receives town trash service. The bin should remain with the home if resident moves. If a bin is damaged, bring the damaged bin to Town Hall for a new one, 25 W. Market Street, 8:30 am to 5 pm. Otherwise, additional bins are available for \$6 each.

If you use a regular trash can instead of your bin on recycling day, please help the town's contractor identify recyclables and yard waste. Trash cans **MUST** have a sticker on them in order for material to be collected. Contact trash@leesburgva.gov or 703-771-2790 to request free stickers.

Don't forget! Besides the curb, you can recycle newspaper, cardboard, white office paper, glass, cans, and plastics anytime at one of the town's drop off centers: Food Lion parking lot, South King Street Wal-Mart parking lot, Route 15 Bypass

CAN IT!

Leesburg is our hometown!
Don't be a litterbug!

Street Light Outages - Keep The Lights On!

Several power companies own streetlights in town. To report a streetlight that's out, contact your local company, Dominion Virginia Power, 1-888-667-3000 or NOVEC, 1-888-335-0500.

A service area map and company links are on the town website, www.leesburgva.gov/services/publicworks. Not sure who to call? Contact the public works shop, at 703-737-7073.

ADOPT A STREET, SPOT, OR PARK!

Your community group can volunteer to keep a street, "spot", or park clean and our neighborhoods beautiful. By adopting a street, groups sponsor a minimum of four clean-ups a year. By adopting a spot or park, groups maintain an area for one year with annual or perennial plantings and maintenance. In exchange, the town provides garbage bags, safety vests, and a sign with the community group's name in the adopted area.

For information on adopting streets contact the Engineering and Public Works Department at 703-771-2790. For more information on adopting spots and parks contact Parks Recreation at 703-737-7144.

Give TLC to your grass, trees, shrubs, and flowers –

Tuscarora Landscapers Choice! Town residents receive **FREE** bags of **Tuscarora Landscapers Choice** (TLC), the town's environmentally friendly biosolid product. TLC is slow release, rich in iron (for greener grass), adds organic matter, and is non-burning. It is good for the environment as this high quality product is free for town residents, used at town property, yet sold to landscapers and private firms.

Get a **FREE SAMPLE** at the Leesburg Flower & Garden Festival on April 16th & 17th. Or stop by the town's Water Treatment Pollution Control Facility at 1391 E. Market Street, Leesburg, 20176. Distribution hours are 7 am to 3 pm, daily. For more information on TLC, visit www.leesburgva.gov or call 703-737-7100.

Did You Know?

FREE tree seedling will be available at the **Leesburg-Loudoun Arbor Day Celebration** on April 9th and the Leesburg Tree Commission's booth at the **15th Annual Leesburg Flower & Garden Festival** on April 16th & 17th!

HELP KEEP LEESBURG CLEAN AND BEAUTIFUL!

Join members of the Town of Leesburg Town Council and Keep Loudoun Beautiful in a community clean-up. Kick-off is Saturday, April 23rd, 9 am on the Town Green, 25 W. Market St. Volunteers and Area Leaders are needed. Individuals, youth groups, and neighborhood groups are invited. For more information, including volunteer sign-up, contact 703-771-2700 or e-mail volunteer@leesburgva.gov.
